TEACHER AND STAFF SUPERVISION OF STUDENT TECHNOLOGY USE

Teachers shall not direct or advise students accessing school computing and communications networks to use electronic mail systems other than the Kentucky Education Technology System standard email system.

Teachers must be prepared to integrate the use of electronic resources into the classroom. Generally, the manner in which teachers evaluate instructional materials and content today will apply to the selection of electronic resources. On the Internet, however, information can be made available without being edited by a publisher, screened by a textbook committee, or selected by a known bookseller. Teachers must be cautioned that **quality and integrity of content on the Internet is not guaranteed**. Teachers and students provided permission to do independent research must examine the source of the information. (i.e. Is the source clearly identified? Is it an individual? An organization? An educational institution?)

Students should not be provided with unsupervised access to electronic resources. Tools have been provided to help ensure the safety and proper use of technology but it is the responsibility of the teacher to exercise reasonable supervision of student access to Internet and electronic mail.

District employees and activity sponsors may set up blogs and other social networking accounts using District resources on monitored sites follow District guidelines to promote communications with students, parents, and the community concerning **school-related activities and for the purpose of supplementing classroom instruction**.

Networking, communication and other options offering instructional benefits may be used for the purpose of supplementing classroom instruction and to promote communications with students and parents concerning school-related activities.

In order for District employees and activity sponsors to utilize a social networking site for instructional, administrative or other work-related communication purposes, they shall comply with the following:

1. They shall request prior permission from the Superintendent/designee.
2. If permission is granted, staff members will set up the site following any District guidelines developed by the technology department.
3. Guidelines may specify whether access to the site must be given to school/District technology staff.
4. Staff shall notify parents of the site and obtain written permission for students to become “friends” prior to the students being granted access. This permission shall be kept on file at the school as determined by the Principal.
5. Once the site has been created, the sponsoring staff member is responsible for the following:
 - a. Monitoring and managing the site to promote safe and acceptable use; and
 - b. Observing confidentiality restrictions concerning release of student information under state and federal law.

Staff members are discouraged from creating personal social networking sites to which they invite students to be friends. Employees taking such action do so at their own risk under no responsibility of the district.

Such devices include, but are not limited to, personal cell phones and tablets.

- Staff will refrain from using telephones during instructional time, including personal devices.
- Students may use the telephones under staff supervision when there is a legitimate need such as calling parents to arrange transportation, delivery of medicine or clothes, or similar rare circumstances.
- Instructional time will not be interrupted to transfer calls except in emergencies.
- Due to privacy concerns, and except for emergency situations, personally owned recording devices are not to be used to create video or audio recordings or to take pictures while on duty or working with students except with prior permission from the Principal/designee or immediate supervisor.
- An exception may be made for events considered to be in the public arena (e.g. sporting events, academic competitions, or performances to which the general public is admitted) where the activity does not materially disrupt the event, prevent others from observing the event, or otherwise violate legal rights. School social events for students, activities sponsored by student clubs, and activities during the school day that are not open to the public are not considered to be in the public arena.

DISREGARD OF RULES

Individuals who refuse to sign required acceptable use documents or who violate District rules governing the use of District technology shall be subject to loss or restriction of the privilege of using equipment, software, information access systems, or other computing and telecommunications technologies. Employees and students shall be subject to disciplinary action, up to and including termination (employees) for violating this policy and acceptable use rules and regulations established by the school or District.
